SELECTED PROJECTS

UIUX Designer & Front end Developer — **Manhattan, CA**
Bestia Group LLC — 08/2025 — Present

- Designed and developed the demo-ready UI/UX and HTML, CSS frontend for LA Tech Week, showcasing Bestia's LeadBoard Lite product to investors and enterprise clients.
- Conducted UI/UX analysis sessions with 3+ active real estate agents, iterating designs based on feedback — during this process, 100+ agents signed up to use the prerelease version.
- Translated Figma prototypes into responsive React + HTML/CSS implementations, optimizing layouts for 40+ year-old users with improved readability, accessibility, and mobile compatibility.

UIUX Designer — **Torrance, CA**
Handiers Inc. — 03/2025 — 09/2025

- Designed and developed the frontend for two mobile apps and a marketing website, delivering consistent UI across platforms.
- Led major UX redesigns (chat, booking, and quote request), enhancing clarity and conversion through data-backed decisions.
- Built intuitive, responsive interfaces using Figma and Flutter, collaborating closely with backend devs and the CEO to ship real-time features like camera input and AI estimation.

Rootin, Front End Developer — **Irvine, CA**
GitHub — 09/2024 – 03/2025

- Developed a Flutter application with BLE protocol integration for IoT sensor communication, achieving 95% notification delivery via Firebase Cloud Messaging.
- Implemented MVVM architecture, reusable components, and multi-language support (EN/KO), ensuring compatibility with iOS 14+ and Android 8+.

MakeEat, Full stack Developer — **Irvine, CA**
GitHub — 10/2024 — 01/2025

- Developed a cross-platform Flutter app with AI recipe generation, completing the iOS cycle in 5 days.
- Implemented MVVM with Provider, reusable widgets, Firebase Auth, Firestore, and OpenAI GPT integration.

RealMo, Backend Developer — **Irvine, CA**
GitHub — 09/2024 — 12/2024

- Designed a real-time content moderation system with AWS Kinesis and Rekognition, achieving 95% accuracy and 20% fewer false positives.
- Built a cost-effective, low-latency moderation pipeline optimized for peak traffic.
